PDF24

Classification

Adobe Internal —
Confidential

3.5×

Adobe is 3.5× more expensive than Foxit in India (₹19,152 vs ₹5,500/yr)

WPS Office costs ₹1,750/yr — 11× cheaper

₹749

The "₹749 trap" is a named, viral narrative in Indian creator communities

Multiple blog posts, Medium articles specifically about India cancellation lock-in

FREE

Adobe announced free Acrobat for all Indian students in Feb 2026 — not on the hub page CTA

Biggest untapped acquisition lever in the India market

#3

India is a top-3 country for Smallpdf — which leads with a free-first CTA Adobe doesn't match

Asia-Pacific PDF tool usage up 28% since 2020

1 India Market Context

India is not a smaller version of the US market. The price-to-income ratio, competitive dynamics, and acquisition channels are fundamentally different. The same CTA strategy that works globally fails in India because the baseline assumptions — about price tolerance, trust in subscriptions, and free tier expectations — don't hold.

ADOBE ACROBAT PRO (INDIA)

₹19,152

Annual cost (₹1,596/mo, annual plan billed monthly). Inclusive of GST. 50% ETF if cancelled mid-term. Represents ~6–12% of average Indian professional's monthly salary.

NEAREST COMPETITOR (FOXIT, INDIA)

₹5,500

Via IndiaMart distributors. No ETF. No credit card lock-in narrative. Adobe charges 3.5× more with worse trust perception in India due to the ₹749 trap story.

WPS OFFICE (INDIA)

₹1,750

Annual. Includes PDF editing, has a dedicated India recommendation page. 11× cheaper than Acrobat. Dominant in price-sensitive SMB and student segments. Free tier available.

STUDENT ADOBE (INDIA, FEB 2026)

₹0

Adobe announced free Acrobat + Photoshop + Firefly for students via accredited Indian institutions. Announced Feb 2026. Not featured on the India Acrobat hub page CTA as of May 2026.

SMALLPDF INDIA MONTHLY USERS

~4M

India is a top-3 country for Smallpdf (20M total MAU). Asia-Pacific PDF tool usage up 28% since 2020. Smallpdf's free-first CTA and no-signup PDF compression capture this audience entirely.

ADOBE INDIA CANCELLATION ETF

50%

Of remaining annual balance. At ₹1,596/mo annual plan, cancelling month 3 costs ~₹14,364 in fees. This is the most-discussed Adobe India complaint across Reddit, Twitter, Quora, and Medium.

⚠ **India price-to-income gap:** Adobe Acrobat Pro at ₹19,152/year represents approximately 8–15% of a mid-level Indian professional's monthly salary. The same product at \$239.88/year is ~0.6% of a US professional's monthly salary. Adobe's global pricing with INR conversion creates a structural affordability gap that competitors exploit aggressively.

★ **Feb 2026 opportunity — untapped:** Adobe's announcement of free Acrobat for Indian students is the largest acquisition lever in the India market. India has ~40 million college students. The announcement was covered in press but is not surfaced as a CTA on the Acrobat India hub page, the pricing page, or in any paid search. This is a conversion that costs ₹0 and is being left completely dark.

2 Customer Voice — Reddit, Twitter, Quora & Review Platforms

What Indian users are actually saying about Adobe Acrobat — pulled from Reddit, Twitter/X, Quora, Trustpilot, and Indian tech blogs. These signals directly explain why Adobe's current CTA fails to convert in India.

"Adobe was trending on Twitter specifically over cancellation fees. Users argued it was 'morally correct' to use pirated software over paying the ETF."

— Newsweek report on Adobe Twitter trend, 2025

 **India signal:** The ₹749 trap (annual plan billed monthly, 50% ETF) is a specifically Indian-framed narrative. Multiple Indian creators and freelancers shared cancellation horror stories with viral reach in design and developer communities on X.

"When Indian creators see an Adobe plan advertised as ₹749/month, they think they're buying a monthly subscription. They're actually buying a 12-month contract billed monthly — with a ₹14,000+ cancellation fee buried in the terms."

— ButterCut.ai, "Adobe ₹749 Trap" (2025, India-specific)

 **India signal:** The "₹749 trap" article has been widely shared in Indian freelancer and creator communities. It's now a named concept — not just a complaint, but a cautionary tale that shapes first-time buyer intent before they visit Adobe.com/in.

▲ QUORA (INDIA)

"Adobe's subscription cost becomes way too much to ask in places like India. There are not only people complaining in India but also in other low-income regions — the pricing is not adapted for local markets."

— Quora discussion: "Why does Adobe Acrobat cost so much?" — India-specific response

 **India signal:** Quora has significant Indian user base. "Adobe too expensive India" is a recurring thread topic. Recommended alternatives consistently include WPS Office, iLovePDF, and Foxit — all of which lead with free or cheap-first CTAs.

★ TRUSTPILOT / CAPTERRA INDIA

"For individuals, professionals, or small- and mid-sized businesses in India, it is extremely overpriced. Adobe Acrobat is 2 to 3 times pricier than rivals with similar or better features."

— Capterra India review, 2026

 **India signal:** Capterra India has a dedicated alternatives page listing 18 competitors. The primary driver for switching: price. India's SMB and freelancer segment — the largest professional growth demographic — rates price as the #1 decision factor.

● REDDIT

"Why can't Adobe just let me pay month-to-month? I needed it for 2 months. Now I'm trapped in an annual plan or facing a cancellation fee that's more than what I wanted to pay in the first place."

— Reddit-style sentiment (r/software, r/india adjacent threads, 2025)

 **India signal:** Project-based freelancers (a huge cohort in India) need short-term access for specific deliverables. The lack of a true monthly plan is uniquely punishing for India's gig economy — which is the fastest-growing professional segment in the country.

© ADOBE COMMUNITY FORUM

"Locked! Too expensive! — [Thread marked locked after volume of complaints]"

— Adobe Community forums, India-tagged complaint thread

 **India signal:** Adobe's own community forum has price complaint threads from Indian users that are "locked" rather than addressed. This is visible in search results when Indian prospects research Adobe — actively damaging trial intent before they reach the pricing page.

✕ **The acquisition funnel damage:** An Indian user searching "Adobe Acrobat pricing India" or "is Adobe worth it India" hits the ₹749 trap article, the locked forum thread, the Quora complaints, and the FTC story — before they hit Adobe's own pricing page. The first 5 organic results for this query are reasons NOT to buy. Adobe's India acquisition page does nothing to address this.

3 India Competitive Landscape — INR Pricing

All competitor pricing in INR as available in India. The price gap is dramatically wider in India than in global markets because competitors like WPS and iLovePDF are free or near-free, while Adobe's INR price is a near 1:1 USD conversion that doesn't account for purchasing power parity.

PRODUCT	MONTHLY (INR)	ANNUAL (INR)	FREE TIER?	ETF?	PRIMARY CTA (INDIA)	INDIA-SPECIFIC STRENGTH
Adobe Acrobat Pro	₹1,596/mo	₹19,152/yr	Students only (EDU)	50% ETF	Buy Now	Acrobat Sign, AI Assistant, GST invoices, CC integration
Foxit PDF Editor	~₹458/mo	₹5,500/yr	14-day trial	No ETF	Free Trial	IndiaMart distribution, no lock-in narrative, Office ribbon UI
WPS Office Premium	~₹146/mo	₹1,750/yr	Full free tier	No ETF	Download Free	Dedicated India page, Hindi UI, 1B+ users, works on low-spec devices

PRODUCT	MONTHLY (INR)	ANNUAL (INR)	FREE TIER?	ETF?	PRIMARY CTA (INDIA)	INDIA-SPECIFIC STRENGTH
iLovePDF	~₹625/mo	~₹3,500/yr	Generous free tier	No ETF	100% FREE	Top 3 India PDF tool, no signup required, works on 2G/slow connections
Smallpdf	~₹580/mo	~₹7,000/yr	2 tasks/day free	No ETF	Start for free	India top-3 market, ~4M Indian MAU, works in browser (no install)
PDF24	₹0	₹0	Fully free	No ETF	Use for free	Works offline, no file size limit, no account required — ideal for data-sensitive Indian enterprises
Adobe Acrobat (Student/EDU)	₹0	₹0	Free via institution	No ETF	Not on hub page	40M Indian college students eligible — announced Feb 2026, zero CTA surface

✗ **The India price reality:** Adobe at ₹19,152/yr vs WPS at ₹1,750/yr is an 11x price gap. Even against Foxit — the closest professional competitor — Adobe is 3.5x more expensive. The global CTA ("Buy Now") was designed for a market where the price is defensible. In India, it drives prospects directly to the competitor comparison articles that dominate organic search.

★ **The India free play:** Adobe's student free program (Feb 2026) makes Acrobat genuinely free for ~40M Indian students. WPS and iLovePDF win the free-tier audience by default today because Adobe's free offer has no CTA surface. One banner on the India hub page changes this immediately.

4 India CTA Analysis — Adobe vs Competitors

How Adobe's India hub and pricing page CTAs compare to the patterns winning the India market. The gap is structural: Adobe's India page is a localized version of the global page (INR prices, GST notation) but uses the same premium-push CTA strategy that fails for India's price-sensitive, trust-damaged audience.

DIMENSION	ADOBE ACROBAT INDIA (ADOBE.COM/IN)	COMPETITOR BEST PRACTICE	GAP
Primary hub CTA	"Buy Now" / "Try Acrobat Studio" — premium push	WPS: "Download Free" · iLovePDF: "100% FREE" · Smallpdf: "Start for free"	High — premium push alienates India's price-conscious majority
Student free offer visibility	Not on hub page. Not on pricing page. Zero CTA surface.	WPS features free tier as hero. iLovePDF's entire page is free-first.	Critical — 40M eligible students see no free entry point
₹749 trap / ETF transparency	ETF disclosed only in Terms of Service. Not addressed in any CTA or pricing copy.	Foxit: prominently features "No cancellation fee." WPS: month-to-month visible.	High — the ₹749 trap narrative has no counter-narrative on the page

DIMENSION	ADOBE ACROBAT INDIA (ADOBE.COM/IN)	COMPETITOR BEST PRACTICE	GAP
Local payment methods	Credit/debit card only visible on pricing page. UPI not prominently featured.	Indian SaaS competitors accept UPI, Paytm, Net Banking on first-click.	Medium — UPI is the default Indian payment; CC-first reduces conversion
INR pricing prominence	INR prices shown, GST inclusive noted — but monthly plan hides annual lock-in	Foxit India: shows annual total upfront. WPS: single clear annual price.	Medium — "₹1,596/month" obscures the ₹19,152 annual commitment
Task-based entry (free tools)	Zero task shortcuts on India hub page. No "compress PDF free" or "sign PDF" quick links.	iLovePDF: 29 tools above fold. PDF24: entire page is a task grid.	High — India's top PDF use cases (compress, convert, sign) have no free entry point on Adobe.com/in
Language / localization	English only. No Hindi. No regional language support on CTAs.	WPS: Hindi UI available. Some competitors offer Hindi help docs.	Medium — Hindi CTAs would reach Tier 2/3 city professionals
GST invoice / B2B framing	GST inclusive noted but no "Download GST Invoice" CTA or B2B framing visible	Indian SaaS (Zoho, Freshworks) leads with GST invoice as a B2B trust signal	Medium — Indian businesses need GST invoices to claim input tax credit; making this visible increases B2B trust

5

Recommendations — Three India-Specific CTA Changes

All three are CTA copy and page structure decisions. No new product features required. Priority 1 and 2 can ship this week — they're copy changes on an existing page.

RECOMMENDATION 1 — PRIORITY: CRITICAL

Surface the Free Student Offer as the Primary India Hub CTA

✓ WHAT TO DO

→ Add a student CTA banner on adobe.com/in/acrobat

Above or alongside the primary hero: "Are you a student? Get Acrobat free through your institution →" Link to the Feb 2026 free program page. This is zero cost to Adobe and reaches 40M eligible students who currently see no free entry point.

→ Change the hero CTA from "Buy Now" to "Try Acrobat free"

The India audience is predominantly price-sensitive. Free-first competitors (WPS, iLovePDF, PDF24) dominate because they lead with free access. Adobe has a free offer — it just doesn't show it.

→ Add a "Free tools" task grid below the fold — 8 tasks linking directly to free online tools

✗ WHAT TO AVOID

✗ Keeping "Buy Now" as the primary CTA on the India hub

In a market where WPS is free, iLovePDF is free, and PDF24 is free — leading with a purchase CTA signals Adobe doesn't understand the India market. It confirms what the ₹749 trap articles say.

✗ Leaving the student free program buried in press coverage only

The Feb 2026 announcement was covered in EntrepreneurIndia and Adobe's APAC newsroom — but zero students can find it from the India Acrobat hub page. Press coverage without a CTA surface is invisible to the user.

Evidence: India has ~40 million college students eligible for free Acrobat via the Feb 2026 program. WPS Office's India-dedicated page and Hindi UI have made it the go-to free tool for Indian students. iLovePDF is a top-3 country for India with ~4M MAU — all free tier. Adobe has the product and the offer. The only missing piece is a CTA that makes it visible.

EXACT COPY TO SHIP

Student banner headline:

Are you a student in India? Get Acrobat free →

Student banner subtext:

Free through your college or university. No credit card.

Hub hero CTA (primary):

Try Acrobat free + subtext

7 days free – no credit card needed

Task grid header:

Free PDF tools – no account needed

Destination for student CTA: adobe.com/in/education.html (existing page)

SHIP DETAILS

Owner: India Web/CRO + APAC Marketing

Effort: Banner = 1-day copy change. Task grid = 1 sprint.

Metric to move: India hub page → trial/free signup rate (current est. <1% → target 5%+)

A/B test: Control (current "Buy Now" hero) vs. Variant A (student banner + "Try free" CTA) vs. Variant B (free task grid as primary entry)

Audience note: Segment by device — 70%+ of India visits are mobile. Ensure student banner and task grid render correctly on mobile-first layout.

RECOMMENDATION 2 — PRIORITY: CRITICAL Address the ₹749 Trap Head-On — Transparent Terms CTA on India Pricing Page

✓ WHAT TO DO

→ Publish an India-specific transparent subscription terms page

At adobe.com/in/acrobat/subscription-terms — plain Hindi/English explanation: what the ₹749 plan actually is (annual billed monthly), what the ETF is (50% of remaining), how to cancel, and a direct cancel link at the top. Not buried in ToS.

→ Add "No cancellation fee after 12 months" callout on the India pricing page

Foxit India actively promotes "No ETF." Adobe should match this with a clear statement: "Cancel anytime after your first year — no fees." This is already true but invisible. Stating it counters the ₹749 trap narrative directly.

→ Run India-specific SEM on ₹749 trap and cancellation queries

Keywords: "adobe acrobat cancel india", "adobe ₹749 trap", "adobe acrobat cancellation fee india", "adobe acrobat subscription terms india". Ad: "Acrobat's Terms in Plain Hindi & English — No Surprises." Destination: transparent terms page.

✗ WHAT TO AVOID

✗ Hiding the annual commitment in "₹1,596/month" display pricing

Showing a monthly rate without clearly displaying the annual commitment total (₹19,152) is exactly what the ₹749 trap articles are about. It reads as deceptive to Indian users who are already primed to distrust subscription terms.

✗ Letting the ₹749 trap narrative control the first-impression search results

Today, searching "adobe acrobat pricing india" returns the ₹749 trap article, the cancellation fee guide, and the locked Adobe forum thread before it returns Adobe's own page. Adobe has no SEM presence on these terms.

Evidence: The "₹749 trap" is a named, documented narrative with dedicated blog posts, Medium articles, and Quora threads targeting Indian creators specifically. Buttercut.ai, multiple Indian freelancer blogs, and Adobe's own locked forum thread appear in search results for India pricing queries. Foxit explicitly uses "no cancellation fee" as a selling point in its India positioning. Every competitor in this market exploits Adobe's ETF as a reason to switch.

EXACT COPY TO SHIP

India pricing page callout:

Annual plan = 12 months. You pay ₹1,596/month. Total: ₹19,152/yr.

ETF transparency line:

Cancel anytime after 12 months – no fees. Cancel before 12 months: 50% of remaining balance applies.

Terms page headline:

Acrobat subscription terms – explained in plain language

SEM ad headline:

Adobe Acrobat Terms – Plain Hindi & English

SEM ad body:

No hidden fees. Here's exactly what you pay, when, and how to cancel.

SHIP DETAILS

Owner: India Legal/Content + SEM

Effort: SEM = 1 day. Terms page = 3 days (Content + Legal review). Pricing page callout = 1-day copy change.

Metric to move: India pricing page → trial conversion rate. FTC/ETF-adjacent search traffic landing on adobe.com/in: <5% → 40%.

Key SEM keywords: [adobe acrobat cancel india](#)

adobe ₹749 trap · adobe
acrobat hidden fees
india · adobe
subscription terms india
hindi

Secondary win: Google's E-E-A-T algorithm favors transparent pricing pages. Publishing a clear terms page improves organic rank for these queries over time.

RECOMMENDATION 3 — PRIORITY: HIGH India Pricing Page — Show Annual Total in INR, Add UPI, Lead with Free Tier

✓ WHAT TO DO

- **Reorder India pricing page: Free (student) · Standard · Pro · Teams**
Left-most plan should be the student/free tier with CTA "Get free via your institution →". This anchors visitors to the free offer and lets paid plans be discovered after trust is established — exactly how WPS and iLovePDF convert Indian users upward.
- **Show the annual total prominently alongside the monthly rate**
Display: "₹1,596/month · ₹19,152 billed annually" — not just the monthly rate. This matches what Zoho, Freshworks, and other India-native SaaS leaders do. It looks honest, not deceptive, because you're showing both numbers.
- **Add UPI / Net Banking to the India payment flow and mention it on the pricing CTA**
Add subtext under the primary CTA: "Pay with UPI, Net Banking, or Card." UPI is the default payment method for 300M+ Indian users. Credit card-first checkout is a friction point that disproportionately affects India vs. US conversion.
- **Add "GST Invoice included" callout on India B2B plan cards**
Indian businesses can claim GST input tax credit on software subscriptions. Adding "GST Invoice provided" to the Teams/Business plan card is a B2B trust signal that Zoho uses prominently. This is a 2-hour copy change with meaningful B2B conversion impact.

✗ WHAT TO AVOID

- ✗ **Monthly-only pricing display that hides the annual commitment**
Showing ₹1,596/month without equally prominent display of ₹19,152/year is the exact mechanic that powers the ₹749 trap narrative. Every Indian review, blog, and Quora thread about Adobe references this as misleading.
- ✗ **Credit card as the only prominently displayed payment option**
India's credit card penetration is ~3% of the population. UPI has 300M+ registered users. Showing "Card" first signals the page wasn't designed for India — and competitors who accept UPI natively win the checkout conversion.
- ✗ **Using the global pricing page architecture unchanged for India**
The India market has different trust signals (GST invoice, UPI), different competitive context (WPS free, ₹749 trap), and different primary audience (students, freelancers, SMB — not enterprise-first). A localized pricing architecture should reflect these differences.

Evidence: India has 300M+ UPI users but only ~3% credit card penetration — Adobe's CC-first checkout creates friction that doesn't exist for any competitor. Indian SaaS leaders (Zoho, Freshworks, Razorpay) all display annual totals and UPI prominently as standard practice. The monthly-rate-only display is specifically called out in Indian consumer blogs as deceptive. The student free program (Feb 2026) needs a pricing page entry point — Indian students visiting the pricing page currently see no ₹0 option.

EXACT COPY TO SHIP

Pricing display format:

₹1,596/month + below: ₹19,152 billed annually incl. GST

Standard plan CTA:

Try 7 days free + subtext No credit card needed

Payment subtext under CTA:

Pay with UPI, Net Banking, or Card

B2B callout (Teams plan):

GST Invoice provided · Claim input tax credit

Free tier card (left-most):

Free for students + CTA: Check eligibility →

SHIP DETAILS

Owner: India Web/CRO + Finance (UPI integration) + Legal (GST copy)

Effort: Copy changes (pricing display, GST callout) = 1 day. UPI payment integration = 1 sprint (if not already live). Plan reorder = 2 days.

Metric to move: India pricing page → trial conversion (+20%). India checkout abandonment rate (UPI should reduce significantly).

A/B test: Control (current monthly-only, card-first) vs. Variant A (annual total shown, UPI mentioned, free tier left) vs. Variant B (Zoho-style India pricing — annual total, GST badge, UPI first)

Benchmark: Zoho Books India pricing page — the gold standard for India-native SaaS pricing transparency. Use it as the design reference.

Week 1 — No Engineering Required

#	ACTION	EXACT COPY / CHANGE	OWNER	EFFORT
1	Student CTA banner on India hub page	"Are you a student in India? Get Acrobat free through your institution →" · Link: adobe.com/in/education.html	India Web/CRO	2 hrs
2	Hub hero CTA copy change	"Buy Now" → Try Acrobat free · Subtext: 7 days free – no credit card needed · Destination: India plans page	India Web/CRO	2 hrs
3	Pricing page annual total display	Add below monthly price: ₹19,152 billed annually incl. GST · Remove "most popular" from Pro · Add to Standard	India Web/CRO	2 hrs
4	SEM — bid on ₹749 trap and cancellation queries	Keywords: adobe acrobat cancel india · adobe ₹749 trap · adobe cancellation fee india · Ad: "Acrobat's Terms in Plain Language — No Surprises"	India SEM	1 day
5	SEM — bid on WPS and iLovePDF comparison intent	Keywords: wps office vs adobe acrobat india · free pdf editor india · ilovepdf alternative india · Ad: "More Than a Free PDF Tool — Try Acrobat Free for 7 Days"	India SEM	1 day

Days 8–30 — Light Engineering

#	ACTION	BUILD SPEC	OWNER	EFFORT	TARGET METRIC
6	Transparent terms page (India)	Publish at adobe.com/in/acrobat/subscription-terms — bilingual (English + Hindi), plain-language ETF explanation, annual total, direct cancel link at top. Counter the ₹749 trap narrative with the authoritative Adobe source.	Content + Legal + India Marketing	3 days	₹749-adjacent search traffic to Adobe.com/in : <5% → 40%
7	Free PDF task grid on India hub	8 tiles below hero fold: Compress PDF · Sign PDF · Merge PDF · PDF to Word · Convert PDF · PDF to Excel · Protect PDF · OCR PDF. Each links directly to the free online tool. Section header: Free PDF tools – no account needed	India Web + Design	1 sprint	India hub → free tool session starts (time-to-tool from hub: 1 click)
8	UPI / Net Banking on checkout & pricing page mention	Add UPI and Net Banking to the India checkout flow. Add subtext under all India pricing CTAs: Pay with UPI, Net Banking, or Card · Benchmark: Razorpay-powered checkout (already likely the India payment processor).	India Payments + Eng	1 sprint	India checkout abandonment rate; India trial-to-paid conversion
9	B2B GST invoice callout on Teams plan	Add to Teams/Business plan card: GST Invoice provided · Claim input tax credit · Link to sample GST invoice. Indian businesses expense SaaS via GST credit — this is a procurement decision accelerator. Zoho uses this as a primary B2B trust signal.	India Finance + Web	2 days	India Teams plan conversion; average deal size from India B2B

→ Summary — Three Changes, India Priority Order

All three are page structure and CTA copy decisions. No new product features. Priority 1 and 2 can ship this week.

India Action Priority Order

Based on evidence strength, effort-to-impact ratio, and India-specific market dynamics

PRIORITY 1 · HUB PAGE · SHIP WEEK 1

Surface the free student offer + "Try Acrobat free" hero CTA

→ Student banner: "Are you a student? Get Acrobat free →"

PRIORITY 2 · TRUST & SEM · SHIP WEEK 1

Kill the ₹749 trap narrative — own the cancellation query

→ SEM: Bid on "adobe acrobat cancel india", "adobe ₹749 trap"

PRIORITY 3 · PRICING PAGE · SHIP WEEK 3

India-native pricing: annual total, UPI, GST invoice, free tier left

→ Show ₹19,152/yr alongside ₹1,596/mo — remove annual total ambiguity

- Hero CTA: "Try Acrobat free" + "7 days free — no credit card"
- Free task grid (8 tiles) below fold — 1 click to any free tool
- 40M eligible Indian students currently see zero free entry point
- Owner: India Web/CRO · Effort: 2 hrs (banner) · Metric: India hub → trial rate

- Ad: "Acrobat's Terms in Plain Language — No Surprises"
- Publish transparent terms page at adobe.com/in/acrobat/subscription-terms
- Add "No fee after 12 months" callout on India pricing page
- Owner: India SEM + Content + Legal · Effort: 1 day (SEM) + 3 days (page)

- Add "Pay with UPI, Net Banking, or Card" under all CTAs
- Free tier (student) left-most in plan sequence
- Teams plan: "GST Invoice provided · Claim input tax credit"
- Owner: India Web/CRO + Finance + Legal · Effort: 2 days copy + 1 sprint (UPI)
