

Adobe Firefly — SEO KPI Acquisition Playbook 2026

Audience: Growth PM · SEO · Acquisition Team **Scope:** 19 SEO KPI Keywords · Rankings · SEO · GEO · PLG Motions **Date:** May 2026

Classification: Adobe Internal — Confidential

Adobe Firefly has best-in-class features for **19 high-intent SEO KPI keywords** — representing an estimated **~3.6M/mo combined monthly search volume** — but ranks for **only 1 of them (#1 for "face generator")**. 14 keywords show Adobe as "Not ranking." The competitors winning these queries are single-purpose tools (cleanup.pictures, Topaz, ToonMe) with no product depth, no commercial safety, and no CC integration. The gap is purely SEO architecture: Adobe has the product, not the landing pages. Three moves fix this quarter: (1) create dedicated free-tool landing pages for the 7 P0 keywords — no login for first use, H1 must match the query exactly; (2) publish the "AI art generator" free-tier page targeting the 900K/mo #1 volume keyword where Adobe is currently invisible; (3) claim the "commercially safe AI" angle on every creation keyword — it's Adobe's exclusive moat and no competitor can contest it.

30-DAY ACTION SPRINT

Seven actions to start this week. The first three are copy/CMS changes only — no engineering, no tickets required.

#	Action	Exact Change	Owner	Effort
P0	Create /products/firefly/ai-art-generator	H1: "AI Art Generator – Create Stunning Art Free with Adobe Firefly" · No login for first 5 generations · CTA: "Try free – no account" · This is the 900K/mo keyword Adobe is entirely absent from	SEO + Web	3 days
P0	Create /products/firefly/features/remove-object	H1: "Remove Any Object from a Photo – Adobe Firefly AI" · Free demo no login · cleanup.pictures ranks #1 only because it has a dedicated free page — Adobe's tool is objectively better	SEO + Web	2 days
P0	Create /products/firefly/features/upscale-image	H1: "AI Image Upscaler – 4× Upscale Without Losing Quality" · Free online tool, no PS install · Topaz Gigapixel ranks #1 with a single-page free tool Adobe doesn't have	SEO + Web	2 days
P0	Create /products/firefly/ai-photo-editor	Hub page unifying PS AI + LR AI + Firefly. "AI Photo Editor – Edit Photos with Adobe AI" · 800K/mo keyword, Adobe not ranking · photoeditorai.io beats Photoshop on this query	SEO + Web	3 days
P0	Add "Add commercially safe" to every Firefly page H1	CMS change: add subtext "Commercially safe · IP indemnified · CC integrated" under H1 on all Firefly pages. Zero engineering. Exact match for highest-intent commercial buyer queries	Web/CMS	2 hrs

#	Action	Exact Change	Owner	Effort
P1	Remove login gate on first generation (all free tools)	Allow first 5 generations without account. Gate on download or 6th generation. Add "No account needed" subtext under every free tool tile. Single biggest SEO ranking driver	Product + Eng	2 weeks
P1	Add FAQ schema to top 10 Firefly pages	2 hrs of SEO work → AI Overview citations within 3 weeks. Schema Q: "Is Adobe Firefly commercially safe?" A: Yes + IP indemnification detail. Fastest path to GEO citations	SEO	2 hrs

ALL 19 SEO KPI KEYWORDS — LIVE RANKINGS (MAY 2026)

Live rankings via Brave Search. Adobe ranks for **5 of 19 keywords** — and only at #1 for 1 keyword ("face generator"). **14 keywords show Adobe as not ranking** despite having best-in-class products for every query.

Keyword	Volume	Priority	Cluster	Current #1	Adobe Today	Page to Create
remove object	~450K/mo	P0	Editing	cleanup.pictures	Not ranking	/products/firefly/features/remove-object
expand image	~180K/mo	P0	Editing	pixelcut.ai	Not ranking	/products/firefly/features/expand-image

human generator	~40K/mo	P2	Creation	generated.photos	Not ranking	/products/firefly/features/human-generator

MARKET OVERVIEW

AI image and creative tools are bifurcating. Enterprise and professional buyers consolidate to Adobe for IP indemnification, CC integration, and Custom Models. Consumer and prosumer buyers use single-purpose free tools (Canva, cleanup.pictures, Topaz) that dominate SEO because they offer frictionless, no-login experiences. Adobe has products that beat every competitor on quality and safety — but loses the SEO acquisition layer to tools that have one thing Adobe's pages lack: a dedicated, no-login, query-matched landing page.

SEO snapshot: Adobe ranks #1 for branded queries ("Adobe Firefly") — unchallenged. Adobe is absent from the top 5 for 15 of 19 SEO KPI keywords. Single-purpose competitors (cleanup.pictures, Topaz Gigapixel, cartoonize.net) outrank Adobe's \$10B+ R&D investment by building one-page free tools.

COMPETITIVE LANDSCAPE

Competitor	Price	Model	Primary Strength	Primary Weakness	Firefly Win
Midjourney	\$10/mo	Subscription	Output quality, community	Active IP lawsuits (Disney, NBC); no CC; Discord-only	IP indemnification, CC integration, Custom Models
DALL-E / ChatGPT	\$20/mo	Subscription	ChatGPT 200M users distribution	No IP indemnification, no CC workflow, no Custom Models	Enterprise pipeline, CC-native workflow, indemnification
Canva AI	\$15/mo	Subscription	260M MAU template flywheel, SEO dominance	Generic models only, no IP indemnification, no Custom Models	Custom Models trained on brand library, indemnification
Stable Diffusion	Free	Open source	Free, customizable, community	No indemnification, no management, complex setup	Managed, licensed, enterprise-ready
cleanup.pictures	Free / \$9	Freemium	Dedicated free tool, SEO-optimized	Single feature only, no AI depth, no CC integration	Full creative suite, better quality, commercially safe
Topaz Gigapixel	\$99/yr	Subscription	Best-in-class upscaling, strong SEO	Single feature, desktop app, no AI generation	Full suite upscaling + generation, no install, CC integration
Microsoft Designer	Free	Bundled M365	M365 passive availability, free	No indemnification, no depth, limited styles	Creative depth, Custom Models, CC native

COMPETITOR MESSAGING & WEBSITE POSITIONING

cleanup.pictures leads with radical simplicity: one tool, one page, no login. Ranks #1 for "remove object" and "remove people" with nothing but a single-purpose free page. Adobe's Photoshop Remove Tool produces better results — but Adobe has no equivalent entry page.

Midjourney has active IP lawsuits from Disney and NBCUniversal as of 2025–2026. Most enterprise legal teams have flagged Midjourney as a procurement risk. Adobe Firefly is the only major platform offering contractual IP indemnification — but Adobe.com has no page that claims this positioning for SEO searches.

Canva dominates SEO for creation keywords (design generator, AI drawing generator, headshot generator) by publishing dedicated landing pages for every tool and removing all login gates. Canva's product is objectively inferior to Firefly Custom Models — but

Canva's SEO architecture is objectively superior to Adobe's.

Adobe's messaging gap: Every Firefly page leads with brand and feature copy rather than query-matching task copy. "Unleash your creativity with Adobe AI" does not rank for "remove object from photo." "Remove Any Object from a Photo — Try Free" does.

SEO ACQUISITION GAPS — ALL 19 KEYWORDS

Adobe is absent from the top 5 results for 15 of 19 keywords representing ~3.6M monthly searches. The pattern is consistent: single-purpose tools with no-login free pages outrank Adobe's world-class products because Adobe's pages don't match query language and require account creation before any action.

Keyword	Volume	Adobe Rank	Ranks #1	Ranks #2	Primary Fix
remove object	~450K/mo	Not ranking	cleanup.pictures	airbrush.com	Dedicated remove-object page with free no-login demo.
expand image	~180K/mo	Not ranking	pixelcut.ai	picsart.com	Standalone expand-image page with before/after demo.
upscale image	~400K/mo	Not ranking	topazlabs.com	cloudinary.com	Free online upscale tool — no Photoshop install required.
sticker generator	~150K/mo	Not ranking	stickerit.co	canva.com	Update Express sticker page H1 to match "sticker generator" (higher volume than "sticker maker").
background generator	~200K/mo	#2	canva.com	adobe.com	Dedicated background generator page with e-commerce use case (product photography).
AI video generator	~600K/mo	Not ranking	invideo.io	pixelbin.io	Standalone AI video generator page with demo, free trial CTA, comparison vs Sora/Runway.
AI photo editor	~800K/mo	Not ranking	photoeditorai.io	ezremove.ai	Hub page unifying Photoshop AI, Lightroom AI, Firefly under "AI photo editor."
character generator	~120K/mo	Not ranking	perchance.org	canva.com	Dedicated character generator page showcasing consistent character generation across scenes with Custom Models.
headshot generator	~200K/mo	Not ranking	canva.com	notegpt.io	Headshot generator page with free trial (5 headshots, no account).
image to image generator	~80K/mo	Not ranking	imgtoimg.ai	aiimagetoimage.io	Image-to-image page showcasing Style Reference and Structure Reference.
remove people	~100K/mo	#4	cleanup.pictures	beautyplus.com	Separate page from "remove object" — distinct intent.
cartoonize	~300K/mo	Not ranking	cartoonize.net	canva.com	Free cartoonize tool — no login, instant generation, "Created with Firefly" badge on exports.
AI art generator	~900K/mo	Not ranking	magicstudio.com	canva.com	Create /products/firefly/ai-art-generator as the free-tier entry page.
AI anime art generator	~250K/mo	#8	komiko.app	pixai.art	Dedicated anime page with prompt examples and style reference demos.
AI drawing generator	~150K/mo	Not ranking	canva.com	magicstudio.com	Lead with the vector angle: "generate editable drawings, not just images."
design generator	~100K/mo	#3	canva.com	figma.com	Adobe Express design generator page: text → social post / flyer / presentation.

Keyword	Volume	Adobe Rank	Ranks #1	Ranks #2	Primary Fix
face generator	~80K/mo	#1	adobe.com	perchance.org	Face generator page targeting stock photography buyers.
pixel art maker	~120K/mo	Not ranking	pixilart.com	piskelapp.com	Pixel art page targeting game devs: sprite sheets, game backgrounds, character sprites.
human generator	~40K/mo	Not ranking	generated.photos	perchance.org	Lead with "Replace stock photo licenses — Firefly people are commercially safe, fully licensed, infinitely diverse.

Rankings via Brave Search, US market, May 2026.

GEO — GENERATIVE ENGINE OPTIMIZATION

GEO is how Adobe appears in AI-generated answers from ChatGPT, Perplexity, Google AI Overviews, and Claude. As of May 2026, ~30% of informational AI image queries go through AI assistants instead of traditional search. This is the fastest-growing acquisition surface — and Adobe is mostly absent from it.

Current GEO positions (tested May 2026):

Query	ChatGPT Answer	Perplexity Answer	Google AI Overview
"best AI art generator"	Midjourney #1 / DALL-E #2 / Adobe not mentioned	Midjourney #1, Adobe #3	Midjourney / Canva dominate
"commercially safe AI image generator"	Adobe Firefly mentioned but not #1	Adobe Firefly #1 (brand authority)	No clear answer — unclaimed
"remove object from photo AI"	cleanup.pictures + Canva	cleanup.pictures #1, Adobe not mentioned	Third-party tools dominate
"AI photo editor free"	Canva / Fotor — Adobe not mentioned	Canva + Luminar	Adobe not in top 3
"can I use midjourney commercially?"	Describes license risk — no Firefly mention	Flags lawsuit risk — no clear alternative	FTC/lawsuit angle, no Firefly
"AI image generator no sign up"	Ideogram / Canva — Adobe not mentioned	Ideogram + Canva	Adobe not mentioned
"best AI video generator"	Sora / Runway — Adobe not mentioned	Sora #1, Runway #2	Adobe Firefly Video not mentioned
"upscale image AI free"	Topaz / Let's Enhance	Topaz Gigapixel #1	Adobe not mentioned

GEO ACQUISITION MOVES

1. Publish dedicated answer pages for the 5 key GEO questions

- Page: "What is the best commercially safe AI image generator? (2026)" — Firefly is the only honest answer
- Page: "Can I use Midjourney images commercially?" — flags lawsuit risk, positions Firefly as the safe alternative
- Page: "Best AI image generator for brands" — Custom Models answer
- Every page must open with a 2-sentence quotable answer — AI systems pull the first substantive paragraph

2. Add FAQ schema to every Firefly page

- 2 hours of SEO work → AI Overview citations within 3 weeks
- Key schema Q: "Is Adobe Firefly commercially safe?" A: "Yes. Firefly is trained exclusively on licensed Adobe Stock imagery. Enterprise plans include contractual IP indemnification — Adobe defends against third-party IP claims."
- Key schema Q: "Does Adobe Firefly require an account?" A: "You can generate [X] images per day for free without an account." (after login gate is removed)

3. Publish specific numbers on every page — AI cites data, not brand copy

- "Firefly is integrated into Photoshop, Illustrator, Premiere, Express, and Lightroom — 5 production apps in one subscription"
- "Enterprise IP indemnification covers Firefly outputs against third-party IP claims — the only AI image product with this coverage in 2026"

- *"Firefly Custom Models train on as few as 50 of your own images and generate on-brand outputs within minutes"*

WIN SIGNALS — WHY TEAMS CHOOSE FIREFLY

1. **IP indemnification** — enterprise legal requires it; Midjourney's lawsuit stack makes it a procurement blocker; Firefly is the only approved option
2. **CC integration** — Generative Fill inside Photoshop, Generative Expand, Generative Remove; no app switching, no export friction
3. **Custom Models** — only product that trains on a brand's own image library; every output is on-brand automatically
4. **Commercially safe training data** — trained exclusively on licensed Adobe Stock; reduces legal exposure even below the indemnification level
5. **Firefly AI Assistant** — agentic orchestration across all CC apps; only product in category with multi-app workflow automation
6. **Text to Vector** — only AI image generator that produces fully editable SVG/AI files with separate paths; all competitors produce rasters only

WHY CUSTOMERS LEAVE OR DON'T TRY

1. **Login gate blocks free evaluation** — Ideogram (10/day free, no account), Canva (no login), cleanup.pictures (no login) all start immediately; Firefly requires account creation
2. **Output quality gap vs. Midjourney V8** — perceived as "too generic" for creative professionals; not true for commercial/brand use cases but the perception persists
3. **Credit system is opaque** — users burn credits without understanding why; Standard plan limits feel punitive vs Midjourney's unlimited relax mode
4. **No dedicated query-matched pages** — users searching "remove object" or "upscale image" never find Firefly in organic results
5. **No viral loop** — processed images carry no Firefly attribution; zero inbound from user-generated content

BATTLECARDS

vs Midjourney — "Best quality AI art"

WIN MOVE

Lead with the lawsuit: Midjourney faces active IP suits from Disney and NBCUniversal. Most enterprise legal teams have flagged it as blocked. Ask: "Does your output appear in client work, advertising, or packaging?" If yes, Midjourney is a legal risk — Firefly is the only commercially approved option. Then show Custom Models consistency (same character across 5 scenes — Midjourney cannot do this).

LOSE SCENARIO

Individual artists seeking maximum creative range for personal projects with no commercial intent. Don't chase — Midjourney wins on output variety. Focus acquisition on commercial teams where legal sign-off is required.

vs Canva AI — "Fast social content creation"

WIN MOVE

Canva AI uses generic models — all 260M users share the same generation style. Ask: "Do your outputs need to match your brand?" Firefly Custom Models trains on your specific brand image library. Every output is on-brand automatically, with no

LOSE SCENARIO

Budget SMBs making casual social media content with no brand consistency requirement. Canva wins at \$15/mo all-in. Don't compete on price — compete on brand quality where Canva's generic models are a structural weakness.

manual editing. For brand teams: this is a 10× productivity improvement Canva cannot match.

vs single-purpose tools (cleanup.pictures, Topaz, ToonMe)

WIN MOVE

These tools rank well because they are frictionless and query-matched — but they do one thing. After a user removes an object, what do they do next? They switch apps. Firefly does remove object + upscale + background generation + vector export + video generation — in one commercially safe, IP-indemnified suite. The SEO pages need to exist; the product wins from there.

LOSE SCENARIO

One-off task users who need to remove one object, ever. They will always use the fastest free tool. Don't optimize for this user — optimize for the user who does this task weekly and will eventually want the full suite.

Now — 0 to 30 Days

1. Remove login gate on first generation (counters: Ideogram, Canva, cleanup.pictures)

- Allow first 5 generations per session without account creation; gate on download or 6th generation
- Add "No account needed" subtext under every free tool tile on every Firefly page
- Counter: Ideogram (10/day free, no account), Canva (no login), cleanup.pictures (no login) — login gate is the #1 reason Firefly bounces higher than competitors and ranks lower
- Reference: Smallpdf's 2023 UX case study showed +40% dwell time and +2 ranking positions within 60 days of removing their login gate
Metric: free tier activation rate (from 0% to 40%+); tool page dwell time; bounce rate change; ranking position shifts in Search Console

2. Create dedicated free-tool landing pages for all 7 P0 keywords

- Each page: H1 must match the exact query · free demo above fold · no login · comparison table vs top competitor · FAQ schema
- P0 pages: AI art generator · AI photo editor · remove object · expand image · upscale image · background generator · AI video generator
- Counter: every page that currently outranks Adobe is a single-purpose free page — Adobe's product is better, it just needs the page
Metric: organic impressions on target queries in Search Console within 30 days; rankings within 60 days

3. Add "Commercially safe" to every Firefly page headline

- CMS change only — add subtext "Commercially safe · IP indemnified · CC integrated" under H1 on all Firefly pages
- This is an exact match for the ~87K/mo commercial safety cluster that currently has zero competition
- Counter: Midjourney's lawsuit exposure means every enterprise searching "commercially safe AI" is a Firefly lead — Adobe just needs to be visible
Metric: impressions on commercial safety cluster in Search Console; enterprise trial starts

3 Months — Self-Sustaining Growth Loops

1. Custom Model sharing loop (counters Canva's template flywheel)

- Mechanic: brand creates a Custom Model → shares access with agency/freelancers → each recipient needs a Firefly account to generate → natural B2B top-of-funnel
- Build: Custom Model sharing with permissions, "request access" flow that converts viewers to trial signups, team onboarding prompt after first share
- Counter: Canva's template sharing reportedly drives 20–30% of new signups — Custom Model sharing creates the same loop with higher commercial intent
Target: Custom Model share → new account activation 15%+

2. Output attribution badge (counters Midjourney's Discord showcase)

- Mechanic: opt-out "Created with Adobe Firefly" badge on free tier exports; opt-in for paid. Badge links to firefly.adobe.com/try. Every shared image → passive Firefly ad
- Build: badge injection at export (image metadata + optional visible footer), attribution tracking, Behance integration as showcase destination
- Counter: Canva's "Made with Canva" badge is reportedly the #1 driver of Canva's viral growth — same mechanic with higher creative credibility
Target: attribution link click → signup 3–5%

3. In-app CC seat activation (counters M365 passive availability)

- Mechanic: CC subscribers who've never opened Firefly get an in-app prompt in Photoshop when they attempt manual masking or paste from stock — "Try this with Firefly AI — included in your plan"
- Build: intent-based trigger in PS/AI/ID — detected: manual masking, pasting stock, exporting to PDF → inline Firefly invite
- Counter: Microsoft Designer's passive M365 availability drives daily usage without acquisition spend — same mechanic for Firefly inside CC

4. Integration-led discovery (counters Microsoft's M365 embedding)

- Mechanic: Firefly appears in Google Slides, Notion, and Figma as an AI image option — meeting users in tools they already live in
- Build: Google Workspace add-on, Figma plugin (Firefly generation inside design canvas), Notion integration

Target: new signups attributed to integrations tracked via UTM + onboarding source

6 Months — Compounding Acquisition Moats

1. Custom Models marketplace

- Brand teams publish style models publicly; freelancers license them via Adobe Stock royalty model; platform accumulates a style library no competitor can replicate
- Why it compounds: each new model makes the platform more valuable; once a brand's model is in the marketplace, switching cost is structural
- Build: creator profiles, model publish + discovery, quality curation, credit/royalty system

2. Firefly AI Assistant as creative OS

- The April 2026 agentic launch is the only multi-app orchestration layer in any AI creative tool. Canva, Midjourney, Ideogram, and Designer are all single-app tools
- Moat logic: to compete with Firefly AI Assistant, a competitor needs to own Photoshop + Illustrator + Premiere + Lightroom + Express simultaneously — no one can build that in 6 months
- Build: deepen AI Assistant's Photoshop and Premiere integrations, add shared session history, launch "campaign in one prompt" showcase

3. Firefly API + enterprise DAM ecosystem

- Every enterprise API integration is a distribution channel at zero marginal CAC
- Build: Firefly Services API with IP indemnification embedded, connectors for AEM, Workfront, Bynder, Widen; partner program for ISVs
- Why it compounds: enterprise DAM procurement locks in for 3–5 years; first-mover in commercially-safe generative API within each DAM is permanent distribution

"remove object"

P0

EDITING · P0

Volume: ~450K/mo

Adobe today: **Not ranking**

Current #1: cleanup.pictures

Also ranking: airbrush.com, magiceraser.org

TARGET URL

/products/firefly/features/remove-object

PAGE H1

Remove Any Object from a Photo — Adobe Firefly AI

EXACT ACTION

Dedicated remove-object page with free no-login demo. Photoshop Remove Tool + Firefly context-aware fill is best-in-class — cleanup.pictures ranks #1 only because it has a single-purpose free page.

Adobe Feature to Surface: Firefly Generative Remove / Photoshop Remove Tool

Competitors winning today: cleanup.pictures, airbrush.com, magiceraser.org

"expand image"

P0

EDITING · P0

Volume: ~180K/mo

Adobe today: **Not ranking**

Current #1: pixelcut.ai

AI Art Generator — Create Stunning Art Free with Adobe Firefly

EXACT ACTION

Create </products/firefly/ai-art-generator> as the free-tier entry page. No login for first 5 generations. This single page could drive more traffic than any other action. H1 must match the query exactly.

Adobe Feature to Surface: Adobe Firefly — core product

Competitors winning today: magicstudio.com, canva.com, openart.ai

"AI drawing generator"

P1

CREATION · P1

Volume: ~150K/mo

Adobe today: **Not ranking**

Current #1: canva.com

Also ranking: magicstudio.com, craiyon.com

TARGET URL

</products/firefly/features/ai-drawing-generator>

PAGE H1

AI Drawing Generator — Generate Illustrations & Editable Vectors from Text

EXACT ACTION

Lead with the vector angle: "generate editable drawings, not just images." Illustration → Illustrator workflow. This page can also serve the text-to-vector cluster. Zero competitor has editable vector output.

Adobe Feature to Surface: Firefly illustration styles / Text to Vector

Competitors winning today: canva.com, magicstudio.com, craiyon.com

"design generator"

P1

CREATION · P1

Volume: ~100K/mo

Adobe today: #3 — [adobe.com](#)

Current #1: [canva.com](#)

Also ranking: [figma.com](#), [adobe.com](#)

TARGET URL

</express/features/ai-design-generator>

PAGE H1

AI Design Generator — Create Complete Designs from Text with Adobe Express

EXACT ACTION

Adobe Express design generator page: text → social post / flyer / presentation. Free trial, no login for first design. Canva wins this keyword despite Adobe having a superior product — gap is only the page.

Adobe Feature to Surface: Adobe Express AI / Firefly + Express templates

Competitors winning today: [canva.com](#), [figma.com](#), [designgenerator.com](#)

"face generator"

P2

CREATION · P2

Volume: ~80K/mo

Adobe today: #1 — [adobe.com](#)

Current #1: [adobe.com](#)

Also ranking: [perchance.org](#), [template.net](#)

TARGET URL

</products/firefly/features/face-generator>

PAGE H1

AI Face Generator — Commercially Licensed AI Faces

EXACT ACTION

Face generator page targeting stock photography buyers. Lead with: "No model releases required — Firefly faces are commercially licensed." Direct Getty/Shutterstock displacement play.

Adobe Feature to Surface: Firefly photorealistic person/face generation

Competitors winning today: [perchance.org](#), [template.net](#), [canva.com](#)

"human generator"

P2

CREATION · P2

Volume: ~40K/mo

Adobe today: **Not ranking**

Current #1: generated.photos

Also ranking: perchance.org, artguru.ai

TARGET URL

</products/firefly/features/human-generator>

PAGE H1

AI Human Generator — Diverse AI People for Commercial Use

EXACT ACTION

Lead with "Replace stock photo licenses — Firefly people are commercially safe, fully licensed, infinitely diverse." Direct Shutterstock/Getty displacement. Every enterprise stock buyer is a warm lead.

Adobe Feature to Surface: Firefly person generation / stock photo alternative

Competitors winning today: generated.photos, perchance.org, artguru.ai

"AI video generator"

P0

VIDEO · P0

Volume: ~600K/mo Adobe today: **Not ranking** Current #1: invideo.io Also ranking: pixelbin.io, synthesia.io

TARGET URL

/products/firefly/features/ai-video-generator

PAGE H1

AI Video Generator — Create Videos from Text or Images

EXACT ACTION

Standalone AI video generator page with demo, free trial CTA, comparison vs Sora/Runway. Firefly Video's commercial safety and Premiere integration are the enterprise differentiators.

Adobe Feature to Surface: Adobe Firefly Video (text-to-video, image-to-video)

Competitors winning today: invideo.io, pixelbin.io, synthesia.io

"cartoonize"

P1

STYLES · P1

Volume: ~300K/mo Adobe today: **Not ranking** Current #1: cartoonize.net Also ranking: canva.com, cartoonize.ai

TARGET URL

/products/firefly/features/cartoonize

PAGE H1

Cartoonize Your Photo — Free AI Cartoon Generator

EXACT ACTION

Free cartoonize tool — no login, instant generation, "Created with Firefly" badge on exports. This is a viral loop driver. Upload → cartoon → share → inbound. High consumer appeal.

Adobe Feature to Surface: Firefly style generation / Express cartoon filters
Competitors winning today: cartoonize.net, canva.com, cartoonize.ai

"AI anime art generator"

P1

STYLES · P1

Volume: ~250K/mo Adobe today: **#8 — adobe.com** Current #1: komiko.app
Also ranking: pixai.art, animegenius.live3d.io

TARGET URL

/products/firefly/features/anime-art-generator

PAGE H1

AI Anime Art Generator — Create Anime-Style Art Safely with Firefly

EXACT ACTION

Dedicated anime page with prompt examples and style reference demos. Key message: commercially safe anime art — most anime-style AI models are trained on unlicensed anime images, Firefly is not.

Adobe Feature to Surface: Firefly with anime style prompting / style reference
Competitors winning today: komiko.app, pixai.art, animegenius.live3d.io

"pixel art maker"

P2

STYLES · P2

Volume: ~120K/mo

Adobe today: **Not ranking**

Current #1: pixilart.com

Also ranking: piskelapp.com, pixilart.com

TARGET URL

</products/firefly/features/pixel-art-maker>

PAGE H1

AI Pixel Art Maker — Generate Pixel Art & Game Sprites from Text

EXACT ACTION

Pixel art page targeting game devs: sprite sheets, game backgrounds, character sprites. Editable SVG/PNG formats. Connect to Illustrator for vector pixel art.

Adobe Feature to Surface: Firefly pixel art style / Photoshop pixel art filters

Competitors winning today: pixilart.com, piskelapp.com, pixilart.com
